

Automatic Folding of T-Shirts

Now even small shops can Fold and Bag 400 -600 Units per hour with one or two operators

NEDCO EZ Fold TX-5-S offers the Competitive Edge

The **TX- 5-S** Auto T-Shirt Folder combines folding capabilities in a user friendly & economical design.

Features:

NEDCO Patented **Positive Track technology:** allows garments with low lubricity factors (such as screen printed goods) to move through the system uninterrupted during production .

TX-5-S has adjustable fold plates: Just like the full size EZ Fold high speed production models, the **TX-5-S** will be able to fold your product to any width between 6” and 11” or more .

Space saving with smaller, light and less weight design: Meets the needs of not only the large production shops with multiple stations, but the smaller businesses as well. Easily rolls into a corner or back room for storage when not in use - 8 ft long and 3 ft Wide. Multiple units can be used in various remote locations throughout your facility.

TX-5-S is belt to belt design folding equipment with production rate capability exceeding 400 –600 units per hour. Fewer moving parts allow for easy operation and very simple and in-expensive maintenance.

Options: Return to operator: **TX-5-S** can returns the folded product to the operator so there is no need for a second person in this production line and other options are PLC Product Counters and **Bagger / Sealer/Incline Conveyor line** for capability to grow your business, with Folding, Bagging and Sealing up to 8,000 or 16,000 units in a 40 hour week with one or two operators. Photo Eye Start is standard.

Power Requirements:

110 volts AC-60Hz. Other voltage available upon request
